Element	Code	Options

Grid	`<div class=row>`
	
	`    <div> … </div>`
	`    …`
	
	`</div>`
		• Columns: just a `div`, `.col3`, `.col23`, `.col34` etc.
		• `.contain` constrains to standard page width
		• Columns have equal width automatically. If a column gets explicit width, the others divide the rest equally among themselves. When columns become too narrow for one row, they are wrapped to another row automatically.
		• `.row.half` for 2-column row on mobile
		• `.row.border` for column borders
		• use `.pad` or `.pad-x2` for padding
		• embed `.box` in cells for boxes with different background, border etc.
		• `.row.border-all` for borders around each cell
		• cell alignment classes: `.align-right`, `.align-center`, `.align-top`, `.align-middle`, `.align-bottom`
		• add space between cells with `.row`'s `border-spacing` property or `.spacing`, `.spacing-horizontal` or `.spacing-vertical`
		• `.row.no-gutter` for glued rows and cells
